

FLOOR GRAPHIC FOR CARPETS

Tips for Best Results

- Designed to be applied to low-pile commercial-grade carpets. Suited for indoor use only.
 - Be mindful of temperature and install only when temperatures are above 50°F (10°C). Avoid applying over corrugated surfaces and across any gaps.
 - **CARPET PREP & MAINTENANCE:** The carpet surface should be free of lint, dirt and debris prior to applying the graphics. A thorough vacuuming is highly recommended. If any shampoo or carpet cleaner is used, be sure to allow enough time for the carpet to completely dry before applying the graphic. Warm water/mild soap (dish detergent) and a sponge can be used to periodically clean the top surface of the graphic.
-

Instructions

- 1** The next step is applying the floor graphic to the carpet. We recommend laying out the floor graphics ahead of time to ensure proper placement and positioning.
 - 2** Begin by peeling off the backing paper (release liner) 1-2 inches down from the top of the decal. Fold and crease the backing paper.
 - 3** Align and apply the graphic starting at the top. The adhesive backing is quite strong so make sure the graphic is in position before applying. Once the graphic is in place, use firm strokes with a plastic squeegee or a soft cloth until the entire adhesive makes contact with the carpet.
 - 4** Slowly peel down the backing paper a few inches at a time while continuing to smooth out any air pockets or wrinkles with the squeegee. When finished, re-squeegee around the edges of the graphic to make sure that all of the edges are adhering properly to the carpet.
- **CAUTION:** To avoid risk of injury, remove any graphic where the edges lift off the carpet and create a tripping hazard.
-

Removal Instructions

Lift up one edge of the graphic and pull using short quick strokes. For best results, pull up at an angle less than 45 degrees. **PLEASE NOTE:** Not all carpets are manufactured identically and some low-pile plush carpets may not have the same adherence properties. Please test all carpets prior to final application of the graphic to make sure the adhesive removes cleanly.
